The increasing popularity of smart phones, computer, video games and television has made children very inactive in their lifestyles. The time spent on these things may be spent doing some physical activities. Sports and games are ways of facilitating children's mental and physical growth. Sports help them with character building and provide them energy and strength they need to make the most of their nascent years. To develop their interest in sports, THE SET SCHOOL arranged a **SPORTS DAY** where the SETTIANs participated in many races and proved themselves. They were awarded with medals as a token of appreciation.

The discipline of **Taekwondo** helps the children recognize and handle situations in which self-defense may be required. This training is also given in the school and a **TAEKWONDO DISPLAY** was organized in the school to appreciate the art of our athletic kids.
